RE: Questions/Answers
Bid # 431-2003-PA12-001
Red River-Bull Bayou, Wildcat, and Redoak Lake Fields,
Red River Parish
Bid Opens: November 15, 2011 at 11 am

QUESTION: Reference page 17 item #13: Can this be done by the contractor or is someone specifically trained or licensed for this type of work required?

ANSWER: The samples may be collected by the contractor in accordance with section 2, item 30 with representative samples taken from each grid. Sample collection must be witnessed by a Conservation Enforcement specialist and the lab analysis must be conducted by a LELAP accredited laboratory as outlined in section 2, item 30.

QUESTION: Reference page 20 item #14: Can this be done by the contractor or is someone specifically trained or licensed for this type of work required?

ANSWER: The samples may be collected by the contractor in accordance with section 2, item 30 with representative samples taken from each grid. Sample collection must be witnessed by a Conservation Enforcement specialist and the lab analysis must be conducted by a LELAP accredited laboratory as outlined in section 2, item 30.

QUESTION: In section 7 Item "A": I was wondering about the cleanup on this well. Will we have to dig up the contaminated soil and dispose of it? Or are we to pump the water off and let the soil be as it was when we arrived at the well site? If the soil is to be hauled off, how many yards?

ANSWER: Once the sample analysis has been conducted and submitted as required in Section 7 Item A #13, a soil remediation plan will be developed for this site on a change order basis. Pumping the water out and properly disposing of the water IS to be included in the lump sum cost for this well but not soil removal at this time.

PAGE 2, Questions/Answers

**Bid # 431-2003-PA12-001, Red River-Bull Bayou, Wildcat, and Redoak Lake Fields,
Red River Parish**

QUESTION: In section 7 Item "C": When bidding this well do we need to consider that the land owner does not want the pits closed?

ANSWER: No, provide a cost to close the pit as requested in the bid. However, it remains the right of DNR to remove any site or pit from the bid package due to a change in conditions or circumstances, see Section 2, item 37, through a change order and DNR requests these pit closures be conducted as the last items in the execution of the scope of work.

QUESTION: Does the requirement to divide pits and facility containment areas into ten square meter grid patterns with representative samples taken from each grid mean that one sample per each ten meter area is required or that soil collected from each ten meter area can be composited into one sample?

ANSWER: As detailed in Section 2, item 30, "For sampling purposes, pits and facility containment areas are to be divided into a ten square meter grid pattern with representative samples taken from each grid." One sample per each ten square meter area is required.
